

For students who think ahead

At ASML we fully recognize the need for technical talents. Not only does our own future as a high-tech company depend on it, but society as a whole needs to continue innovation.

That's why we offer students ample opportunity to meet ASML, do an internship or graduation at ASML or even apply for a scholarship. If you have any questions about internships, school projects or graduation assessments please do not hesitate to contact our internship coordinator via internships@asml.com; +31 40 268 6773.

ASML Scholarship

More information about the scholarships we have to offer and how to apply.

Internship at ASML

More information about internships, the compensation and benefits for interns and how to apply.

Campus promotion

More information about our collaboration with various study associations (the Netherlands and Belgium).

Meet ASML

You can come and visit an Career Day, sign up for a student excursion or visit one of the lunch lectures.
