

# Customer Support

## Training

Our Mission is to improve the capabilities of ASML and customer engineers to maintain ASML products at the agreed availability and performance.

## Vision

Develop and deliver a blended learning program and knowledge base to provide the right skills, processes and knowledge to troubleshoot and maintain the ASML products at our customer sites. Customer Support (CS) Training develops and offers formal learning programs covering People, Processes and Products (3P), using various learning methods like instructor led training, self study weblectures and hands-on training.

## Training Centers

ASML has training facilities in The Netherlands and Taiwan.

For information on training that ASML delivers in The netherlands please contact:
